R. M. WILLIAMS, W. M.

Personat .- John H. Reed, an old Ohio acquaintance, came to upon us like an apparition, on Friday evening last. He is making a reconpoissance of the Great West, and came down from Nebraska on the steamer McGill As the steamer lay here all night, and a dance was in progress on board during the greater part of the night, we had an opportunity for a long chat; and we venture to say that he never awass ered half so many questions in the same length of

time in his life. Mr. Reed, like every other observing person, thinks there is no country that can begin to compare with ours. He intends exploring Kun. All sas, and purchasing lands; and he says that if he can get his family in the notion, he means to pull up stakes and locate out here somewhere. After being out this way, he is astonished that so many persons remain in the old fogy East until moss grows on them.

Hon. M. S Adams, of Leavenworth, Speak er of the Kansas House of Representatives on two occasions, called upon us, Monday after. noon. He remained but a short time, as he was on a business trip, that demanded his attention. Judge Adams is one of the best men in the State, and will do to keep in view, against the time when the people conclude they want houest and capable men for office.

We noticed our old friend, Thomas Bradley, of Claytonville, Brown County, on the street, the other day. He has almost recovered from the injuries received a few weeks ago, but says he had a close call for his back-bone.

We notice May L. H. Utt dodging about town, having arrived a few days ago, after an nce of almost three years, in Southern California, where his name is Norval; on the Grampian Hills he feeds h's flocks. He is well pleased with his location, and says he is "making the riffle" in the sheep business. If no bad tidings come from his "ranche," he expects to remain here the greater part of the Summer.

FRARY BOAT RUNNING AGAIN .- The rise, on Friday merning, was sufficient to enable the White Cloud steam ferry boat to be worked off of the bar on which she was grounded, and by OVALS. Agents make more mon noon on that day she was at her old place, make vings, than with snything ever (ssued.
